

# PRINCESS *Lilies*®

## Princess Lilies® Alstroemeria

The Ramm Princess Lilies range is recognised in the market for their beautiful flowers, compact habit and incredibly tough nature.

And now introducing three new varieties into the range - Lisa, Feline and Eliane Light Pink. Holding the same fantastic qualities that the Princess Lilies are known for, but with intense, vibrant colours that stand out in the garden.

Bred by Royal Van Zanten and produced in Australia from elite quality tissue culture, Princess lilies offer a terrific colour range and will flower for up to 9 months of the year. These varieties look great year round - the lily-like flowers can cover the entire plant, and when out of the flower the foliage remains a neat, compact mounded habit.

- Notes from the Ramm Botanicals R&D Team:**
- Prolific flowering in the sun & shade
  - Good drought tolerance
  - Rhizomatous root structure that holds nutrients and moisture for long term use
  - Most compact Alstroemeria on the market
  - Great for use in pots, gardens or border planting

### Key Information

Height	30cm
Width	40cm
Tray size	105 plugs per tray
Price per plug	
Label supplier	Norwood
Label bundle size	125
Label code	Various
