

Lomandra confertifolia 'SIR5' Ⓟ

Wingarra®

**AVAILABLE TO LICENCED OZBREED
GROWERS ONLY**

Lomandra Wingarra has been performing in tough Australian landscapes for over a decade. This is due to its unique deep rhizomes that are unseen in other confertifolia varieties, making it tougher than the rest.

Wingarra has fine blue-green foliage that contrasts with small yellow flowers, creating beautiful texture in the garden. Ideal for borders and mass planting, this Lomandra is extremely low maintenance.

HIGHLIGHTS:

- Improved fine leaf form.
- Ideal for borders, specimen and mass planting.
- Tolerates humidity, drought and frost.
- Small yellow flowers appear from September to November.

Species	<i>Lomandra confertifolia</i>
Common name	Strappy leaf grass
Produced from	Tissue Culture
Height/width	40cm / 60cm
Growing pH	5.5-6.5
Finishing Times	In 140mm. 18-20 weeks
Pest & Disease	Relatively pest and disease free
Position	Full sun to moderate shade
